MRI Brain Scan

Love creates different types of happy chemical in the brain. These chemicals can be detected by an MRI scan. When two brains are compared, there are significant differences.

The Human Brain

Dr Small and Ms Vorgan publishes a book stating that “Recent brain scan studies show that love dramatically changes the brain”.

Psychological Types of Love

Philia – The friendship of two people with shared goodwill

Eros – Passionate or romantic love

Philautia – One's self love which can be healthy or unhealthy
